## Warranty

The material contained in this document is provided "as is," and is subject to being changed, without notice, in future editions. Further, to the maximum extent permitted by applicable law, Nimsoft LLC disclaims all warranties, either express or implied, with regard to this manual and any information contained herein, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. Nimsoft LLC shall not be liable for errors or for incidental or consequential damages in connection with the furnishing, use, or performance of this document or of any information contained herein. Should Nimsoft LLC and the user have a separate written agreement with warranty terms covering the material in this document that conflict with these terms, the warranty terms in the separate agreement shall control.

## Technology Licenses

The hardware and/or software described in this document are furnished under a license and may be used or copied only in accordance with the terms of such license.

No part of this manual may be reproduced in any form or by any means (including electronic storage and retrieval or translation into a foreign language) without prior agreement and written consent from Nimsoft LLC as governed by United States and international copyright laws.

## Restricted Rights Legend

If software is for use in the performance of a U.S. Government prime contract or subcontract, Software is delivered and licensed as "Commercial computer software" as defined in DFAR 252.227-7014 (June 1995), or as a "commercial item" as defined in FAR 2.101(a) or as "Restricted computer software" as defined in FAR 52.227-19 (June 1987) or any equivalent agency regulation or contract clause. Use, duplication or disclosure of Software is subject to Nimsoft LLC's standard commercial license terms, and non-DOD Departments and Agencies of the U.S. Government will receive no greater than Restricted Rights as defined in FAR 52.227-19(c)(1-2) (June 1987). U.S. Government users will receive no greater than Limited Rights as defined in FAR 52.227-14 (June 1987) or DFAR 252.227-7015 (b)(2) (November 1995), as applicable in any technical data.

## Trademarks

Nimsoft is a trademark of CA.

Adobe®, Acrobat®, Acrobat Reader®, and Acrobat Exchange® are registered trademarks of Adobe Systems Incorporated.

Intel® and Pentium® are U.S. registered trademarks of Intel Corporation.

Java(TM) is a U.S. trademark of Sun Microsystems, Inc.

Microsoft® and Windows® are U.S. registered trademarks of Microsoft Corporation.

UNIX® is a registered trademark of the Open Group.

ITIL® is a Registered Trade Mark of the Office of Government Commerce in the United Kingdom and other countries.

All other trademarks, trade names, service marks and logos referenced herein belong to their respective companies.

For information on licensed and public domain software, see the *Nimsoft Monitor Third-Party Licenses and Terms of Use* document at: [http://docs.nimsoft.com/prodhelp/en\\_US/Library/index.htm?toc.htm?1981724.html](http://docs.nimsoft.com/prodhelp/en_US/Library/index.htm?toc.htm?1981724.html).

# Contact CA Nimsoft

## Contact CA Support

For your convenience, CA Technologies provides one site where you can access the information that you need for your Home Office, Small Business, and Enterprise CA Technologies products. At <http://ca.com/support>, you can access the following resources:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- CA Support policies and guidelines
- Other helpful resources appropriate for your product

## Providing Feedback About Product Documentation

Send comments or questions about CA Technologies Nimsoft product documentation to [nimsoft.techpubs@ca.com](mailto:nimsoft.techpubs@ca.com).

To provide feedback about general CA Technologies product documentation, complete our short customer survey which is available on the CA Support website at <http://ca.com/docs>.

# Chapter 1: New and Changed Functionality

---

This release of UMP provides the following new features and enhancements:

## **Nimsoft Mobile 7.0**

- View and manage alarms on Android and iOS devices. Visit [docs.nimsoft.com](https://docs.nimsoft.com) for Nimsoft Mobile 7.0 documentation.

## **USM Enhancements**

- Device views can display multiple IP addresses, MAC addresses, and other device attributes.
- Nimsoft Monitor Health provides quick access to Admin Console from USM.
- Overall improvements to performance and usability.

## **Discovery Enhancements**

- Redesigned Discovery Wizard.
- Launch the Discovery Wizard from the *Inventory* node (formerly the Discovery node) or from the Actions menu.
- As discovery runs, the Inventory view is updated and new systems are highlighted in blue.
- Updates to the Inventory can be paused.
- Status of discovery is displayed at the top of the Inventory list.

## **Additional Enhancements**

- Configure SMTP email server settings in Report Scheduler.
- Select the level of detail for the PDF version of an SLA report in SLA Reports and Report Scheduler.

# Chapter 2: Requirements

---

To improve accuracy and provide the most current information possible, system requirements are now provided at [support.nimsoft.com](http://support.nimsoft.com). This section provides links to online resources, and additional information that is not at the Support site.

- For a list of supported operating systems, databases, and browsers, see the *Nimsoft Compatibility Matrix* at:  
[http://support.nimsoft.com/downloads/doc/NMSCompatibility\\_SupportMatrix\\_current.pdf](http://support.nimsoft.com/downloads/doc/NMSCompatibility_SupportMatrix_current.pdf).
- For information on components that are no longer supported or that have limited support, see the *Nimsoft End of Sales & Support* document at:  
[http://support.nimsoft.com/Files/Announcement/current\\_end\\_of\\_sales\\_announcement.pdf](http://support.nimsoft.com/Files/Announcement/current_end_of_sales_announcement.pdf).

**Note:** You must have a login to access the Support site. You can request one by emailing [support@nimsoft.com](mailto:support@nimsoft.com).

This section contains the following topics:

[Hardware Requirements](#) (see page 9)

[Additional UMP Requirements](#) (see page 10)

[Supported Languages](#) (see page 10)

## Hardware Requirements

### Memory

4 GB minimum of RAM if you install UMP and supporting probes (wasp, dashboard\_engine, and dap) on a dedicated server, which is recommended.

**Note:** The wasp and dashboard\_engine probes are resource intensive. Based on the amount of memory available, configure wasp and dashboard\_engine appropriately.

### Swap space

For Linux and Solaris, 4 GB of swap space, 6 GB recommended. The Windows OS allocates swap space as needed, so there is no minimum requirement.

### CPU

3 GHz processor with two cores or more, x86 32-bit or 64-bit.

## Additional UMP Requirements

### Linux requirements

For systems running Linux, the libstdc++.so.5 library is required.

**Note:** The OS platform of the host that UMP is installed on must be the same as the OS platform of the primary hub. For example, if the primary hub runs on a Linux host, UMP must also be installed on a Linux host. However, the OS *version* does not have to be the same, and can be any supported version.

### Nimsoft Dashboard Generator

Nimsoft Dashboard Generator (NDG) 2.64 or later requires the Dashboard API.

### Named instances in SQL Server

Named instances are supported, but see the known issue described in Incorrect Port Displayed.

**Note:** Nimsoft is aware of significant improvements in the performance and scalability of MySQL with the release of version 5.5. As a result Nimsoft highly recommends MySQL version 5.5 over MySQL version 5.1. This Nimsoft product supports both versions, but support for MySQL version 5.1 will be discontinued in a future release.

## Supported Languages

UMP is available in these languages:

- English
- Simplified Chinese
- Japanese
- Spanish
- Brazilian Portuguese

# Chapter 3: Known Issues and Workarounds

---

This chapter describes known issues in the product and workarounds in some cases.

This section contains the following topics:

[Deactivate qos\\_processor before Installing UMP](#) (see page 11)  
[Localization](#) (see page 11)

## Deactivate qos\_processor before Installing UMP

If your database provider is MySQL, and you install or upgrade UMP, deactivate the qos\_processor probe before running the UMP installer. Once UMP is installed, re-activate the qos\_processor probe.

## Localization

The following are localization considerations in this release:

- Some portlet views include English-language text which has not yet been localized.
- Account login names can only use English-language characters.

# Chapter 4: Defects Fixed

---

The following defects were fixed in this release of UMP:

## **Compatibility**

- Geo Views unavailable with Oracle.

## **Localization**

- USM metric tree nodes for Private.Application are not internationalized.

## **Multi-tenancy**

- The ACL alarm filter logical operator NOT does not work.
- LDAP account contact users do not appear in the USM alarm assign-to list.

## **Performance, Stability, Scalability**

- SLM Portlet loads slowly in MySQL environment.

## **Usability**

- Report Scheduler doesn't honor the scale value in the PDF version of a report.
- Report definitions with special characters cannot be launched in PRD.
- Reports with the slash character cannot be exported.
- Option to remove legend is not honored in PDF reports.
- The PDF version of SLA Reports cannot be abbreviated.
- SLA reports PDF conversion fails when certain "Percentage" units are used.
- SLM portlet does not display QoS if view\_order is out of order.
- Invalid interface names appear under USM system tab.
- USM search display does not update to show current alarm state correctly.
- USM alarm filters not respected for alarms not associated with a device.
- USM displays incorrect metrics for the selected device.
