Warranty

The material contained in this document is provided "as is," and is subject to being changed, without notice, in future editions. Further, to the maximum extent permitted by applicable law, Nimsoft LLC disclaims all warranties, either express or implied, with regard to this manual and any information contained herein, including but not limited to the implied warranties of merchantability and fitness for a particular purpose. Nimsoft LLC shall not be liable for errors or for incidental or consequential damages in connection with the furnishing, use, or performance of this document or of any information contained herein. Should Nimsoft LLC and the user have a separate written agreement with warranty terms covering the material in this document that conflict with these terms, the warranty terms in the separate agreement shall control.

Technology Licenses

The hardware and/or software described in this document are furnished under a license and may be used or copied only in accordance with the terms of such license.

No part of this manual may be reproduced in any form or by any means (including electronic storage and retrieval or translation into a foreign language) without prior agreement and written consent from Nimsoft LLC as governed by United States and international copyright laws.

Restricted Rights Legend

If software is for use in the performance of a U.S. Government prime contract or subcontract, Software is delivered and licensed as "Commercial computer software" as defined in DFAR 252.227-7014 (June 1995), or as a "commercial item" as defined in FAR 2.101(a) or as "Restricted computer software" as defined in FAR 52.227-19 (June 1987) or any equivalent agency regulation or contract clause. Use, duplication or disclosure of Software is subject to Nimsoft LLC's standard commercial license terms, and non-DOD Departments and Agencies of the U.S. Government will receive no greater than Restricted Rights as defined in FAR 52.227-19(c)(1-2) (June 1987). U.S. Government users will receive no greater than Limited Rights as defined in FAR 52.227-14 (June 1987) or DFAR 252.227-7015 (b)(2) (November 1995), as applicable in any technical data.

Trademarks

Nimsoft is a trademark of CA.

Contact CA

Contact CA Support

For your convenience, CA Technologies provides one site where you can access the information that you need for your Home Office, Small Business, and Enterprise CA Technologies products. At <http://ca.com/support>, you can access the following resources:

- Online and telephone contact information for technical assistance and customer services
- Information about user communities and forums
- Product and documentation downloads
- CA Support policies and guidelines
- Other helpful resources appropriate for your product

Providing Feedback About Product Documentation

Send comments or questions about CA Technologies Nimsoft product documentation to nimsoft.techpubs@ca.com.

To provide feedback about general CA Technologies product documentation, complete our short customer survey which is available on the CA Support website at <http://ca.com/docs>.

Chapter 1: New and Changed Functionality

This release of Unified Reporter (UR) adds support for the Korean language.

Chapter 2: Requirements

To improve accuracy and provide the most current information possible, system requirements are now provided at support.nimsoft.com. This section provides links to online resources, and additional information that is not at the Support site.

- For the supported upgrade path, and supported operating systems, databases, and browsers, see the *Nimsoft Compatibility Matrix* at: http://support.nimsoft.com/downloads/doc/NMSCompatibility_SupportMatrix_current.pdf.
- For information on components that are no longer supported or that have limited support, see the *Nimsoft End of Sales & Support* document at: http://support.nimsoft.com/Files/Announcement/current_end_of_sales_announcement.pdf.

Note: You must have a login to access the Support site. You can request one by emailing support@nimsoft.com.

This section contains the following topics:

[Hardware Requirements](#) (see page 9)

Hardware Requirements

Memory

4 GB minimum of RAM if you install UR, UMP, and supporting probes (wasp, dashboard_engine, and dap) on a dedicated server, which is recommended.

Note: The wasp and dashboard_engine probes are resource intensive. Based on the amount of memory available, configure wasp and dashboard_engine appropriately.

Swap space

For Linux and Solaris, 4 GB of swap space, 6 GB recommended. The Windows OS allocates swap space as needed, so there is no minimum requirement.

CPU

3 GHz processor with two cores or more, x86 32-bit or 64-bit.

Chapter 3: Known Issues

This section summarizes known issues in the product, and provides additional details or workarounds in some cases.

The following are known issues in this release:

Usability

- Multi-byte characters are lost when exported to PDF in Unified Reporter
- Cannot create a custom field based on fields with null values
- No warning message is displayed when empty data is entered for a pre-filter with *contains* operation.

Localization

- JPN: Error message is garbled when ad hoc view is saved.
- Notifications of successful import or export are not localized.
- Column headings and list items of longer strings are truncated in some languages.
- Grouped date formats are not localized in crosstab reports when grouped by Month or Quarter.
- The labels *Totals* and *Total* are not localized in charts created in the Ad Hoc View designer.

This section contains the following topics:

[Do Not Save Reports to the Root Directory of Jaspersoft Repository](#) (see page 11)

[UR Displays Error Filling Report Exception](#) (see page 12)

[Custom URL Frame Does Not Refresh](#) (see page 12)

[Uninstall Does Not Remove Unified Reporter](#) (see page 13)

[Queries of Large RN QOS DATA nnn Tables](#) (see page 14)

Do Not Save Reports to the Root Directory of Jaspersoft Repository

If you are logged in to UR or iReport as an administrative user, and save a report under the root directory of the repository, an error may occur if you then edit the report.

Important! Do not save reports to the root directory of the UR repository.

UR Displays Error Filling Report Exception

Symptom:

In UR, I see the following error message:

com.jaspersoft.jasperserver.api.JSEException: Error filling report

Solution:

This error message may occur if:

- You do not have Nimsoft Service Desk (NSD) installed, and run an NSD report.
- NSD is installed, but the wasp probe is not configured correctly.

If you have NSD installed, use the following steps to edit the wasp in Raw Configure.

Follow these steps:

1. Open Infrastructure Manager, and locate the wasp probe under the **Service** node.
2. Open the wasp probe in Raw Configure.
3. Expand the **webapps/jasperserver-pro** section, and locate the nsdgtw key.
4. Edit the value of the nsdgtw key to be the address of the nsdgtw probe as it is displayed in the Infrastructure Manager **Address** column.
5. Restart the wasp probe.

Custom URL Frame Does Not Refresh

If you create a dashboard and add a custom URL, you have the option of selecting an auto-refresh interval for the custom URL frame. Due to a known limitation with JasperReports, if you select an auto-refresh interval, the frame will attempt to refresh at the interval you specify, but will not successfully refresh. In addition, whether you select an auto-refresh interval, or accept the default **Manual Only** refresh, the custom URL frame will not successfully refresh when you click the refresh button.

Therefore, if you use a custom URL in a dashboard, it is recommended that you:

- Do *not* select an auto-refresh interval
- Avoid clicking the refresh button

If you do click the refresh button, you can reload the dashboard and then the custom URL frame will display correctly again.

Uninstall Does Not Remove Unified Reporter

Symptom:

I ran the UR uninstaller, but UR is still installed on my system.

Solution:

This may happen if you enter an invalid password when running the uninstaller. You can verify that UR is still installed by pointing your browser to `http://<ump_server>:<port>/jasperserver-pro`. If the application loads, then UR is still installed. You can also verify that UR is still installed by opening UR in UMP and running a report. If the report runs successfully, UR is installed.

Note: iReport is not uninstalled by the UR uninstaller. On Windows you can uninstall iReport by using the iReport uninstaller, accessed from the Start menu (JasperSoft > iReport-Professional > Uninstall). On Linux or Solaris, remove the directory that contains the iReport files.

To manually remove UR files:

1. Open Infrastructure Manager.
2. In the tree view, click on the robot for the hub where UMP and UR are installed.
3. Right-click the wasp probe in the top-right pane and choose **Deactivate** from the pop-up menu.
4. Remove UR from the wasp probe by following these steps:
 - a. Click the wasp probe to select it.
 - b. Press <Ctrl> and right-click the wasp probe, then choose **Raw Configure** from the pop-up menu.
 - c. Expand the webapps node.
 - d. Click the jasperserver-pro folder to select it.
 - e. Click **Delete Section**.
5. Remove the following files if present from the robot where UR was deployed:
 - <nimsoft>/probes/service/wasp/tmp
 - <nimsoft>/probes/service/wasp/bin
 - <nimsoft>/probes/service/wasp/tmp_jasper.zip
 - <nimsoft>/probes/service/wasp/webapps/jasperserver-pro
 - <nimsoft>/probes/service/wasp/webapps/jasperserver-pro.war
6. Activate the wasp probe.

Note: This does not delete the database tables created by JasperServer Pro (prefixed with JI) or the stored procedures (prefixed with spn_js). The UR uninstaller also does not delete the database tables.

Queries of Large RN_QOS_DATA_nnn Tables

When executing queries of large RN_QOS_DATA_nnn tables (larger than 10,000 rows) and using MySQL, the table_id and samptime columns should always be included. This is because the RN_QOS_DATA_nnn tables in MySQL have only a single compound index on the table_id and samptime columns.
